Sixteen Years Without LTAs at Flowserve AlMansoori

Flowserve AlMansoori, a leading Service Company for Pumps, Submersible Motors, Valves, Mechanical Seals and general Rotating Equipment related to the energy sector, has recorded a fantastic 16 years without any Lost Time Accidents(LTAs).

The joint venture between Flowserve and AlMansoori Petroleum Industries (AMPI), a division of Abu Dhabi-based AlMansoori Oilfield Services, has recorded zero LTAs at its facility in Mussafah Industrial Estate since 1994.

Franco D'Alessio, general manager of Flowserve AlMansoori, said: "The continuous training and monitoring by Flowserve and Almansoori SHEA (Safety, Health, Environment, Affairs) have helped us to achieve this important target.

"This is a significant achievement for Flowserve AlMansoori and a great testament to the team. The mechanical industry that we are in undoubtedly presents many hazards due to its nature. Our well-trained staff are focused and benefit from a well-implemented QHSE initiative that is imperative and something that we take very seriously."

ENDS

Notes to editors

Flowserve AlMansoori Services Company LLC is a Joint Venture Company between US's origin Flowserve Corporation and Abu- Dhabi based AlMansoori Specialized Engineering (MSE).

Flowserve Corporation is a worldwide supplier of advanced-technology fluid transfer and control equipment systems, and services. Operating world wide, the company produces highly engineered Pumps and pumping equipment, water and oil filled Submersible Motors, precision Mechanical Seals, Seals Systems and accessories and specialty Valves and Valve Actuators and total after sales assistance.

AlMansoori Specialized Engineering (MSE) is the leading regional provider of oilfield services in the Middle East. Established in Abu Dhabi in 1977, the company now has more than 1,000 employees working in over 15 countries providing a variety of oilfield services. AlMansoori Specialized Engineering provides the following oilfield services:

- Production Testing & Early Production Facilities
- Slickline & Completions
- Drill Stem Testing
- Tubular & Industrial Inspection
- Direction Drilling
- Workover Drilling
- Cased Hole Logging & Perforating
- Tubing – Conveyed Perforating
- H2S & Safety
- Technical & Safety Training
- Oilfield Supplies, Trading, & International Agencies
- Manpower Supply
- Oilfield Manufacturing

In addition, AlMansoori Specialized Engineering has entered into joint venture associations and licensing arrangements with several internationally recognised companies in order to provide a wider range of services to its clients. It has gained a reputation and the confidence of our valued customers by providing a complete range of products and services in co-operation with our Joint Venture partners and through our principals with whom we have established agency agreements in the different territories covered.

AlMansoori Specialized Engineering and its associated companies have modern, world-class facilities equipped with state-of-the-art technology and backed by well-qualified staff from more than 35 different nationalities to serve the needs of its clients.

AlMansoori Specialized Engineering is proud to be one of the few companies from the region to have an integrated Health, Safety, Environment and Quality management system. For further details visit our website www.almansoori.biz
